

Firefly Setup & Story Cards

Yoki's custom Firefly Setups combined with the official Story cards.

Yoki's Setups

These custom Setups are detailed at the end of this document.

1. **All Down But Nine:** Teaching first-time players.
2. **Bushwhacker Alert:** For overwhelmed beginners.
3. **Burn the Breeze:** When a set time limit is required.

Story Card Categories

Categories, as in **what type of race are we running**, and how do we win?

1. **Credits:** Be first to earn a certain amount of Credits, or have the most at the end.
2. **Goals:** Be first to finish a series of three Goals in order.
3. **Reps:** Be first to have Solid Reps with a number of Contacts, or have the most at the end.
4. **Tokens:** Be first to collect a number of something, or have the most at the end.

Setup and Story Combos with Play Time per Player

Start by picking how long a game you want to play, **Shorter** (15-30 minutes per player), **Normal** (30-45), **Longer** (45-60), or **Longest** (60-90). Find the entry for your players and their experience (**first-timers**, and **rookies** are listed separately from experienced **players**). The indented entries are the Story cards, and go with the previously listed Setups.

A personal note, I do not recommend 7-10 player games. I've played with 6, and that works and I enjoy it, but some feel that I push the tempo too hard. Without pushing the tempo, the downtime between your turns can be unbearable for some. You could try having two players take simultaneous turns, at the very least you should always let the next player start their turn if the prior player takes a Buy, or Deal Action as their 2nd Action. Experiment and find what you like.
