

Overview/Scoring

Visit contacts to get jobs; at supply planets get new crew/upgrades/equipment/fuel/parts or help disgruntled crew; work a job to get paid, benefits and complete game objectives. Play continues until a scenario completes

Includes all 10th Anniversary content rules: breakin atmo, big damn heroes, pirates/bounties, blue sun, kalidasa, coachworks, crime/punishment, still flying, 10th anniversary.

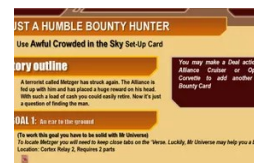

Setup (refer to components on next pages first for overview)

- Place board centre of table
- Get a **setup** card of choice. If using the 'standard' then follow this document instead as it sets up all expansions. If choosing a different one follow it where it deviates only
- Place **alliance cruiser** in centre on Londinium
- Place **Operative Corvette** on planet Cortex Relay 2 sector on right of board
- Place the 3 **reaver** ships top left, one per square in 'reaver space'
- To right of board place **contact** cards (5 shuffled sets) with space for discard
- Place left of board **supply decks** (5 shuffled sets) with space for discard
- Place **nav decks** (2 shuffled sets) on table or bottom left of board if no space
- **3P+ players:** Get Alliance Cruiser/Reaver Cutter cards in nav decks and place in discard pile (they are essentially kept out until the deck is exhausted)
- Place shuffled **misbehave** and **Alliance Alert** decks on table
- Get all tokens and create piles, then determine start player and they get the dinosaur
- From start player (roll die) pick a **leader, ship card**, get associated drive core and
 - Leader cards are crew cards saying 'LEADER' and kept in own deck with the drive cores and some ship default upgrade cards
 - May choose to use 'big damn hero' cards: after picking leader pick a hero and pay. Note: Malcolm already hero so cannot get another. Shuffle rest back in decks
 - Series IV (Esmerelda/Jetwash): have starting upgrades that must be bought
 - Some of other ships have a free ship upgrade, take it (double sided means choice)
- Place drive core in appropriate place beside **ship card** (and upgrades for series IV)
 - Ships SS Walden, Interceptor, Restless Sole: have unique drive cores and cannot be upgraded from supply planets
- From last place going backwards place firefly ship model onto any sector (cannot share spaces)
 - *Normally choose one of the supply planets*

Setup Continued

- Choose story card and read to understand end game and changes
 - If story/setup draws a Capers with a reshuffle, get a new one and shuffle back in
 - Goals to be done in order and uses a work action if there is a skill check, refer to **Work Job**
 - Goals requiring **solid** are not lost when lose solid status
 - Misbehave**/skill check items need **work job** action but not others
 - Story may place destination (use number token) or haven (use haven token in player colour). For havens, place token instead of ship and can only be placed on planets with no other haven tokens, not a supply or contact planet
- Get any (green) set up card as required to alter any game
- Each player gets:
 - 3000 credits, 6 fuel and 2 parts (place in cargo/**stash** and can mix in same square)
 - Take job from each **contact** deck (harken, amnon duul, patience, badger, niska) and discard any amount.
- Turn over 3 cards of each **supply deck** into their discard pile face up
 - Contact** cards are not turned over. Discard populated only if discard
- Place bounty cards next to supply and reveal 3 cards

Expansion Exclusion

- Pirates/bounty hunters expansion:** adds raiding other ships, stealing crew and other PvP activities. To exclude from game, remove **bounty cards** from game and remove piracy jobs/cards whenever they are found.
- Blue Sun:** probably not worth removing as rule changes are minimal and includes large map
 - Could house-rule to not place **alert tokens**
 - Could remove Mr. Universe contact cards to avoid complex jobs
 - Without blue sun expansion, there is only 1 reaver ship in 'firefly' text top right sector
- Kalidasa:** probably not worth removing as rule changes are minimal and includes large map
 - Could remove Corvette and Corvette contact card then skip any nav cards using it
- Crime and Punishment:** Can remove **Alert Cards** deck and do not draw when Alliance Cruiser nav card is revealed
- Capers:** Can remove deck to avoid complex jobs
- Coachworks:** Nothing to remove
- Still Flying:** Nothing to remove

Alternate Setup Rules

- Increase difficulty by using 1 die face (smilie face) from a choice of ways (refer to book)
- Can mix story/setup cards, e.g. always use easier full burn rule (no need to draw nav cards, but at expense of other ships do not move as much)
- Remove from the game 5 unseen cards from each supply and contact deck

Components Overview (learning guide)

Ship Card

- Provides token slots for fuel, parts, cargo, passengers, contraband and fugitives. Also contains secret stash to help hide goods
- Contains card slots for an engine and parts that alter the ship
- Information on crew size, number of jobs that can be carried out

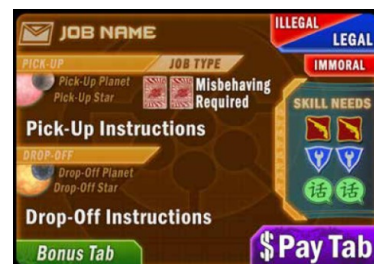

Supply Cards (max 3 cards in hand)

- Crew provide **icons** used mainly for skill checks, an ability, whether they are **moral** or **immoral** (affects certain jobs) and a job type (e.g. pilot, mechanic) that are used for various checks. A leader is picked at the game start. Crew also need to be paid after each job.
- Attached to crew during work job action, gear provides **icons**, abilities and other **keywords** used by skill checks and required by some jobs. Upgrades provide permanent abilities
- **Ship upgrades** are placed with the ship and provide various abilities such as extra storage, turn abilities
- **Big Damn Hero**: better versions of existing crew. Use both but ensure remove from game the other

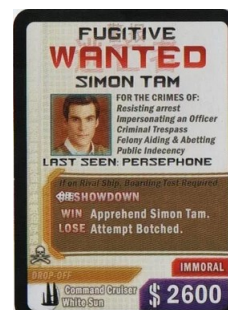

Contact (Job) Cards (max 3 cards in hand, active job limit shown on ship card)

- Each job is provided by one of a number of contacts found at named locations. When a job is completed you become **solid** and the provide benefits such as being able to sell (or buy) to/from them and perks
- The back details the job, the front when you become **solid** with exceptions for Higgins/Niska who have rules for dealing/working a job
- A job will have a pick up/drop off location for goods or a destination to perform a task. Some may have bonuses and pre-conditions such as icons or keywords
- **Legal** jobs are simple but low paid, **illegal** jobs are higher paid but require **misbehaving** which could result in penalties for failure
- **Immoral** jobs **disgruntle moral** crew which will may result in them leaving
- Jobs with **contraband/fugitives** make you an **outlaw** so have to avoid the alliance to avoid penalties
- Jobs cannot be discarded, when finished provide pay, may have a bonus. Each job requires all crew to be paid

Bounty Cards

- Special kind of job but for finding then taking a crew card
 - The visible bounties are always active so do not need to be taken
 - If in a specific deck it will shows on card as 'last seen'
 - Or may already be in a player's (or your own) ship
 - Caught bounties can be stolen by other players

Capers Cards

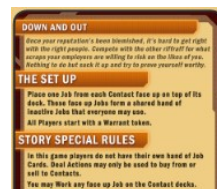

- Special kind of job from Saffron but is risky but with high payout
 - When **Contacts** are mentioned, capers are excluded
 - Can never become **solid** with completing Capers
 - Can perform a **deal** action anywhere as long as player has **deceptive** crew
 - Because only ever 1 Saffron card in play, only 1 player at a time does capers

Components Overview (learning guide)

Story Card

- Provide the end game objectives and any board/rule changes
- Usually pick story after player/ship/start location choice

Setup Cards

- These modify the rules to create variations of play
- The default 'standard setup' is just a reference guide to the base game setup instructions
- If choosing another all empty sections mean follow 'standard setup'
- One 'house rule' to use regardless (it is on one setup card) is to roll die before move and only pick up nav cards when reach that number, e.g. roll 4 means no nav until 4th sector

Misbehavin' Deck

- When drawn during a job provides a dice/skill check to pass and typically provide multiple choices along with an ability to automatically pass if **keywords** are present
- If the skill check fails during a job, the job fails and has to be tried again

Nav Decks

- There are 3 areas on the board: alliance, border, rim
- When moving through areas you may have to draw a card from their deck. Cards are either benign or require skill checks for events that happen (usually to avoid bad things)

Alliance/Reaver/Corvette Contact Card

- When players enter space with one of these ships the contact card is resolved
- Alliance and Corvette contacts only happen with **outlaw** ships

Alert Deck

- Some cards/stories trigger these and affect gameplay rules, typically making things harder

Alert Tokens

- When reavers move they leave a token (stackable). When moving into alert tokens, they trigger a skill check
- Alliance tokens are never placed unless part of the story card but do similar things

Disgruntled Tokens

- Crew typically get disgruntled when they aren't paid or carry out immoral jobs when they are moral
- Crew can leave the ship by being hired by another player or leaving completely
- Disgruntled crew usually become happy again with having shore leave (a 'rest' action essentially)

Other Tokens

- Cargo/Passengers/parts are carried as part of jobs, fuel helps you fly faster
- Fugitives and Contraband are part of more lucrative jobs but you become an **outlaw** where the Alliance space, Alliance cruiser and Corvette ships are risks to avoid
- Wanted tokens on crew and warrants on ships turning them into **outlaws**
- Goals are used to track progress

Alert Token: Do Corvette before Reaver. Remove tokens, roll die: if less than alert tokens another player move nearest Reaver/alliance ship to player. If in alliance space may move Corvette instead or only Corvette when not in Alliance space. Normal contact rules apply (see **Reaver/Corvette/Alliance Ships Interactions**)

Discard/Dismiss: put face up in discard pile - if crew has **Deceptive** tag they are shuffled back into deck and any active capers jobs are removed

Disgruntled: Place token on crew. Another player can **Hire** them.

Double disgruntled leader causes **dismissal** of all crew (remove tokens).

Jump Ship: Double disgruntled crew put in discard pile. Roll die, if less than crew leaving discard 1 upgrade with **SHUTTLE** keyword

Evade: move to adjacent square. Usually if have pilot and avoids reavers. End fly. Cannot evade into reavers

Goods: Cargo, contraband, fuel, parts. Not passengers/fugitives

Kill/Killed: Crew: **discard** crew and remove their tokens, Leader: return to ship and **disgruntled**

- if reavers kill passengers/fugitives then any bounty characters are also killed
- If crew killed during job gear goes back in ship
- If medic is in crew perform medic check (1-4 die as normal, 5-6 do not die)
- Can choose to kill leader: make them disgruntled then return a crew member to the ship

Medic: All medics, even when not shown, can perform a skill check when crew is killed. See **killed**

Outlaw Ship: Outlaw ships cause problems during Alliance encounters

- Cannot use shuttle to do job/work actions when that sector has Alliance ship
- You are outlaw ship if crew have outstanding warrants, are wanted (token or wanted on card) or ship carrying contraband/fugitives (**Illegal jobs**).
- During work job action if gain warrant lose **solid** or any job will lose Harken **solid**.

Remove: return to box

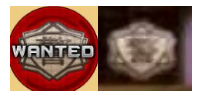

Solid: place contact card(s) above ship, now solid with contact. Can sell (or buy in case of Harken) to them part of 'deal' action and also refer to contact card for solid abilities. Lose **solid** (remove from ship card but may be needed if run out of cards) if ever get warrant while doing work job action to show not solid

Showdown: Attacker picks skill (fight/tech/negotiate), then defender picks. Players assign gear as normal then roll die. Highest wins (defender wins ties). "Thrillin heroics" bonus rolls can be made. Use gear as normal.

Stash: Place to hide goods (some cards ignore stash). If no mention of stash then stash does not hide goods.

Seized: Remove from game

Wanted: When crew become wanted receive **wanted tokens** (only removed when crew is dismissed); Warrant symbol on crew mean they are wanted. Wanted crew create **outlaw ship**.

Warrants: When given are for ship not crew, place **token** on ship and it becomes **outlaw ship**. If get warrant during work job phase then lose job and put warrant on ship
Removing warrants removes them from the ship, not the wanted tokens on crew

Skill Test (also boarding)

- Symbols show skill type, total required to succeed and below other outcomes
 - **Boarding test:** choose tech or persuasion, 6+ is a pass, otherwise fail
- Get +1 for every matching skill (fight, tech, negotiate) found on active cards
- **Kosherised** tag: can only use symbols on crew cards, not other gear
- **Bribes** tag: Before rolling pay multiples of \$100 for +1
- Roll the number of dice shown
 - Smile face is 1, Firefly symbol on dice is 6. Get bonus roll and add to score. Can repeat
- Total must equal or be greater to pass. Get reward or penalty

Play

- Next clockwise player gets dinosaur, performs two actions (no repeats) then repeat until end:
 - If in same location as **reaver** at start of turn resolve reaver contact card then continue actions
 - Alliance cruiser can only move into blue sectors, Reavers can only move into orange sectors

Alternate rules (increase difficulty)

- Start turn: if **Deceptive** crew member roll die. On 1, **disgruntled**
- Start turn: if **disgruntled** crew roll die. If same/less than disgruntled count add 1 **disgruntled** to any crew

Free Actions (any amount and does not count as action)

- **Dismiss Crew**: any sector with a planet **dismiss**
- **Trade**: same sector as another: buy/sell/trade crew, fuel, parts, cargo, contra, upgrades, gear
- **Money**: can transfer money to/from other players at anytime regardless of location, i.e. **deals are allowed**
- **Hire**: players in same sector: hire **disgruntled** non-leader crew by paying their cost then removing disgruntled
- **Cargo**: dump fuel/parts/cargo/contra/(fugitives/passengers at a planet), rearrange cargo/stash

Fly

*If move into sector with reaver or alliance token see **alert token** before nav card or continuing*

- **Mosey**:
 - Move one sector at no cost, do not draw nav card
 - **Can** mosey into sector with reaver
- **Full Burn**:
 - Spend 1 fuel token, move 1 sector, but **cannot** move into sector with reaver ship
- **Rules**
 - If Alliance Cruiser/Reaver Corvette move (or you move) into same sector see **Ships** below
 - If move into sector with reaver or alliance token perform **alert token**
 - Draw/resolve nav card (blue: alliance sectors, yellow: border, red: reaver space)
 - If pass/keep flying repeat move/draw until reach up to drive core card limit
 - If full stop then this action ends
 - If "alliance cruiser" nav card drawn, stop, draw new **Alliance Alert** card then refresh all **bounty cards** (remove existing to discard to bottom of deck and get 3 new cards, also remove from game if the bounty has been removed from the game)
 - Cards are typically benign (do nothing), choose an option or pass test
 - Generally alliance only bad if doing illegal work or carrying wanted crew (in **stash** is not relevant), border space usually ends in death
 - **Solo game**: if nav card moves a ship then move using shortest route, to the left if required to move to adjacent sector and your start location if required to move to any location

Reaver/Corvette/Alliance Ships Interactions

- **Reaver**:
 - If same sector as player nothing happens until start of turn, then resolve **Reaver contact card**
 - Cannot have 2 Reavers in same sector
- **Alliance Cruiser**: If same sector as player and **outlaw**: resolve **Alliance contact card**
- **Corvette**:
 - Can move anywhere on board except the 3 Reaver home sectors
 - If same sector and **outlaw**: resolve **Corvette Contact Card**
 - If same sector as Reaver, remove any Reaver tokens and Reavers go home

Buy

To get new crew/upgrades/equipment/fuel/parts or remove disgruntled

- **Supply planet:** Be at a **Location** shown on a card (sectors have icons showing them)

- **Shore leave:** pay \$100 for every crew including leader then remove all **disgruntled** tokens. **End buy turn**, i.e. cannot buy cards or fuel

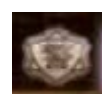

- **Fuel/Parts:** Buy fuel for \$100, parts for \$300. Place in ship

- *Note: Can buy any amount of fuel from Harken during **Deal** phase if **solid***

- **Cards:** May buy crew/upgrades/equipment (max 3 in hand)

- Take 0- 3 cards from discard pile, if less than 3 may draw rest from deck
- May buy up to 2 by paying the bank then put remainder in discard pile
- May browse discard pile at any time
- **Crew** (cards with name/face) with warrant next to cost create **outlaw ship**
 - *Cost is also their cut for every job, max crew size (including leader) is on ship*
- **Ship upgrades/Drive Core** (stated on card) go in ship slots, discard down to fit
 - Interceptor/SS Walden/Restless Sole cannot have drive core upgrades
- **Gear** (all other cards) no limit to amount owned but limits placed during **Deal**

Deal

Get jobs from contacts via contact cards, trade with contacts. Both can be carried out with one action.

Refer to contents page for overview of contact card

- **Buy/Sell goods:** if **solid** and at location can sell (or buy with Harken/Harrow/Fanty contact), then may:

- **Get Job** (visible Bounties are always active for all players):

- Be at Location, take 0- 3 cards from discard pile, if less than 3 may draw rest from deck
- If have **Deceptive** crew (one in each deck except Persephone) can get a Caper job anywhere. If card is 'reshuffle' then resolve immediately
- May take 0-2 cards to hand. Max 3 inactive jobs (discard down)
- If piracy job, location is a sector with another player
- Mr Universe:
 - These go into hand as normal but when work job is started can tuck one under the job or caper
 - Cannot place under piracy/bounties or existing jobs
 - Do not count toward active jobs and must complete both the job and this together
- Reminders:
 - **Illegal** (typically contraband/fugitives) turns you into **outlaw ship**
 - **Immoral** means moral become disgruntled or may not even work the job
 - **Subjective (piracy job)** means immoral if target leader is moral, otherwise moral
 - May require skills or other checks to **work job**
 - May browse discard pile at any time and sell (or buy from Harken) if **solid**
 - **Higgins:** cannot get or progress job if Jayne is in crew
 - **Niska:** there are consequences for Niska

Work Job (or complete a goal, or carry out one of the visible Bounties)

Advance a job or get free money. Finishing job (cannot remove active jobs normally) results in rewards and the full crew (not leader) to be paid (except goals)

- Work job only relates to the period doing this action, not doing other actions, i.e. doing the start/end job does not make work job active permanently or tie crew to equipment
- In Blue Sun area, Uroboros belt job can be any of the 3 sectors. They are not planets unless there is a planet
- **Make Work:** If in sector with a planet, may get \$200 and **end work job action**, otherwise:
- **Start/Progress job or Bounty** by being at location stated on card
 - Place job card (from **Get Job**) to left of ship card on left: max 3 normally
 - Equip crew by giving each crew at most 1 gear. Note cannot change gear until work job phase ends (i.e. can swap outside this action); some crew might not do immoral jobs
 - Follow needs section, will state when it to be done (only relevant during work actions)
 - If lose items, cannot go back to pickup location to get more, need to source elsewhere
 - If get warrant then follow **warrant** for ship. Reminder Niska with warrant has consequences
 - **Mr Universe attach job:** see Mr. Universe in **Deal** action to start/progress his job
 - **Adjacent Sector:** can only put **goods** into shuttle when using shuttle upgrade. Cannot use on sector with Reavers. Ignore **alert tokens**
 - **Bonus Job Opportunity:** when involves being in same sector as another player they must agree
 - **Bonus Drop-Off:** can only be completed before job is finished. Does not require crew to be paid
 - **Piracy type:** be in sector as player, pass **boarding test** then defender may rearrange their ship as pirate cannot take from stash. Then do **showdown**. If steal jobs, may take full amount then discard down
 - **Bounty card:** on another player's ship do **boarding test** then **showdown**; If in supply discard then perform **showdown** with player to right using the cards best skill; If in your crew then no **showdown** but all crew except leader become **disgruntled**. If win, take card/bounty and place to side of ship then get new bounty
 - **Bounty claimed but not finished:** may steal someone's bounty by performing **boarding test** then **showdown** as with gaining bounty on another player's ship. If win can either take the bounty, add them to your crew for free or discard them to their supply
 - **Cortex Bounty card:** exactly the same as bounty but can collect as many types specified for gaining multiple rewards. If stolen then they gain all the cards
- **Complete Job:** get paid, get bonus if allowed, pay all crew (money to bank) even if not part of job (not leader) or job had no reward. Become **solid** with contact
 - If **solid** with Harrow/Fanty earn extra \$500 for jobs from any contact matching their solid text
 - **Bounty:** remove cards from the game, gain the reward. If using 'bounty bonus' lawmen they stack
 - If doing work job to complete a goal (has skill check) then do not pay crew
 - Can decide to not pay some crew, those become **disgruntled**
 - When finish **immoral** (including immoral bounty) give moral crew disgruntled flag (**shore leave** to remove)
 - if already **solid** remove job from the game, otherwise become **solid**

Misbehave: Series of skill tests. Draw one misbehave card at a time, follow to completion **or** may have item on bottom right and if have the keyword/person/etc can pass check. If split and one crew fail then **botched**

- **proceed:** continue job (may be another misbehave). Discard card.
- **botched:** failed, work action over but can attempt again. Discard card.
- **wanted:** place token to all crew not already wanted
- **warrant:** place warrant token on ship, lose **solid** with Harken discard job and become **outlaw ship**

Solo

Can play a single game or campaign style. For single pick a single story, for campaign, choose a number of story cards to play in order, e.g. 3-5, and play each story individually following normal setup/play rules with changes detailed below. This deviates from normal game where story is chosen part-way through setup.

The stories can be any of the following:

- **Choose one of the 9 solo story cards (blue background)**
 - Can use back of any story card for use with any story card for changes
 - The original 'awful lonely in the big black' solo story is in the multi-player brown story deck
- **One of the multi-player brown story cards**
 - Do not choose: great recession, well's run dry, all in who you know, the scavenger's verse, smugglers blues, aces up your sleeve
 - For desperadoes, respectable persons of business, rare specimen indeed: Declare last call **before** discarding last token to win

Setup Changes (refer to components on next pages first for overview)

- Follow setup for normal game with the following changes

Notes: The normal and additional instructions below fully replace the 'standard setup' and 'flying solo –game setup' setup cards. An additional green setup card can be followed as per normal game:

- Create pile/line of 20 disgruntled tokens to act as game time (i.e. 20 turns)
This value can be adjusted up/down to change difficulty
- Remove 5 cards from each supply and contact deck and return to box unseen
- **Single/First campaign scenario:** After setup may spend up to \$1000 to buy up to 4 revealed supply cards
- **Campaign subsequent scenarios:** May spend the money carried over on top of the \$1000 for buying any of the supply cards owned at the end of the previous game. Return/shuffle remaining supply cards.
- Reveal more supply cards to ensure 3 revealed cards per supply deck

Play Changes

Play game as normal with the following changes in order after player turn, in addition all of the optional rules can be made. The standard/optional rules fully replace the flying solo game turn card

- May **Send a Wave** to reveal new cards by performing up to one of the following as long as the cards are not from the current location
 - If No **Buy** (cards) action occurred: reveal 3 cards of a single supply deck
 - If No **Deal** action occurred: reveal 3 cards of a single contact deck
- After each turn, return a disgruntled token, if none are left then one more turn is allowed

End Game Changes during Campaign

- **Solid:** keep solid status by leaving completed jobs under ship, i.e. each job only ever completed once
- **Jobs:** remove all active jobs back to the contact deck and shuffle
- **Money:** for every \$1000 take \$100 from the bank and add to the next story
- **Supply:** Keep current supply cards (upgrades, crew, etc) for setup phase of next scenario

Optional Solo setup rules

- Replace the last 5 disgruntled tokens with: numbered **destination tokens** 1,2,3,4 and finally a disgruntled token at bottom. When number is revealed: roll die, if lower than the number discard all remaining tokens (i.e. one last turn)

Take 2 different main actions (column 1). Unlimited free actions

Free	Dump Cargo	Fuel, parts, cargo, contraband anywhere Fugitives, Passengers at any planet
	Dismiss Crew	At any sector with a planet back to their supply
	Hire	Hire other players' disgruntled staff in same sector by paying their normal buy price
	Trade	Same sector: crew, fuel, parts, cargo, contra, upgrades, gear
	Money	Transfer money to other players anywhere
Fly	Mosey	1 sector, no cost, no nav card, reaver allowed
	Full Burn	1 fuel: upto drive core, 1 nav card/sector, no reaver - Nav card: full stop ends movement Evade: move 1 sector, end movement
Buy	Shore Leave	\$100 per crew (all including leader) Remove all disgruntled
	Supply (planet)	May also buy fuel \$100, parts \$300 and/or Consider 3 discard/deck cards, buy max of 2 - Upgrades/drive core go in slots, may discard - Gear: no limit to amount kept on ship - Crew: limit as ship card
Deal	Job	At Contact Location may buy/sell items if solid, then Consider 3 discard/deck cards - Buy max of 2: Discard hand to max 3 - Mr. Universe goes to hand as normal - Cannot deal/work job with Higgins if Jayne in crew
	Capers Job	Only with Deceptive in crew can Capers job Job can be bought from any sector
Work	Make Work	Any sector with planet get \$200
	Pick Up/Progress Job/Bounty	- Activate job from hand (max 3, cannot discard) - Select crew and equip (max 1 gear) - Follow Needs section - May attach Mr. Universe job from hand - Work job phase ends
	Drop Off/Complete Job/bounty	- As pickup/progress items 1,2,3 - Get paid and become solid (not capers) - IF not a goal, pay entire crew on ship (not leader) even if no reward by returning it to bank or do not pay any amount by disgruntling - Immoral job? Disgruntle moral even if did not work

Other ships, special instructions	
Player Ships	• Mosey free 1 sector, no nav card drawn, may share with Reaver • Move/full [engine core] costs 1 fuel, nav card each sector • Immediate Alliance Contact card if outlaw in same sector • Alliance cruiser card: stop, new alert token, refresh all bounty cards, move Cruiser to you
Alliance Cruiser	• Stays in Alliance space (blue sectors) • Immediate Alliance Contact card if outlaw in same sector • Buy fuel if solid with Harken
Operative Corvette	• Can go in any area of the board (except Reaver start locations) • Immediate Corvette Contact card if outlaw in same sector • Removes Reaver token and sends home Reavers
Reaver Cutter	• Stays in rim or border space • Reaver Contact card if in same sector as player at turn start • +1 Alert Token for each sector moved into
Alert Tokens	• Remove token when in sector then moves ship to you after a dice roll less than token count. • Corvette trumps Reaver, may move Corvette instead of Cruiser • Moves Alliance cruiser or corvette (choice) to you in Alliance Space or corvette when not in Alliance space
Disgruntled	• Can buy other players disgruntled crew • Removed with shore leave • Leave if doubly disgruntled (leader dismisses all crew) then roll die, if lower than disgruntled crew count discard a SHUTTLE card
Warrant, Wanted, Outlaw	• Warrant on ship or wanted crew create outlaw ship • Carrying contraband/fugitives are outlaw ship • Warrant loses job and solid status with active job contact and always with Harken regardless • Wanted tokens can be removed only when discarded • Wanted with Niska is bad (see card)
Medic	If crew killed and MEDIC label, save on a 5,6 roll (only)
Misbehavin'	Choose option or skip if have indicated LABEL
Job, Capers, Piracy	• Jobs are: Normal, bounty or capers • Only active (e.g. equipment) during the action • Capers: only allowed with Deceptive crew. Only 1 deceptive is active at any given time • Piracy: Mr. Universe jobs cannot be used • Piracy: Subjective - immoral if moral crew, otherwise moral • Piracy: Requires boarding test then showdown
Bounty	• Are always available, Cortex allows multiples to be caught • Bounty people are killed by Reavers with fugitives/passengers • As Work Job do boarding skill test then if pass a showdown if on another ship or on same ship just disgruntle all crew • May be stolen by player in same location: boarding test then showdown • Bounty bonus lawmen rewards stack
Skill Tests	• Test shows icon type being tested • Roll dice, add symbols from cards • Kosherised: can only add symbols on crew • Bribes: Pay multiples of \$100 before roll for +1 • If 6, keep rolling • Boarding test: choose tech or persuasion and only 6+ is pass

Take 2 different main actions (column 1). Unlimited free actions

Free	Dump Cargo	Fuel, parts, cargo, contraband anywhere Fugitives, Passengers at any planet
	Dismiss Crew	At any sector with a planet back to their supply
	Hire	Hire other players' disgruntled staff in same sector by paying their normal buy price
	Trade	Same sector: crew, fuel, parts, cargo, contra, upgrades, gear
	Money	Transfer money to other players anywhere
Fly	Mosey	1 sector, no cost, no nav card, reaver allowed
	Full Burn	1 fuel: upto drive core, 1 nav card/sector, no reaver - Nav card: full stop ends movement Evade: move 1 sector, end movement
Buy	Shore Leave	\$100 per crew (all including leader) Remove all disgruntled
	Supply (planet)	May also buy fuel \$100, parts \$300 and/or Consider 3 discard/deck cards, buy max of 2 - Upgrades/drive core go in slots, may discard - Gear: no limit to amount kept on ship - Crew: limit as ship card
Deal	Job	At Contact Location may buy/sell items if solid, then Consider 3 discard/deck cards - Buy max of 2: Discard hand to max 3 - Mr. Universe goes to hand as normal - Cannot deal/work job with Higgins if Jayne in crew
	Capers Job	Only with Deceptive in crew can Capers job Job can be bought from any sector
Work	Make Work	Any sector with planet get \$200
	Pick Up/ Progress Job/ Bounty	- Activate job from hand (max 3, cannot discard) - Select crew and equip (max 1 gear) - Follow Needs section - May attach Mr. Universe job from hand - Work job phase ends
	Drop Off/ Complete Job/ bounty	- As pickup/progress items 1,2,3 - Get paid and become solid (not capers) - IF not a goal, pay entire crew on ship (not leader) even if no reward by returning it to bank or do not pay any amount by disgruntling - Immoral job? Disgruntle moral even if did not work

Other ships, special instructions	
Player Ships	• Mosey free 1 sector, no nav card drawn, may share with Reaver • Move/full [engine core] costs 1 fuel, nav card each sector • Immediate Alliance Contact card if outlaw in same sector • Alliance cruiser card: stop, new alert token, refresh all bounty cards, move Cruiser to you
Alliance Cruiser	• Stays in Alliance space (blue sectors) • Immediate Alliance Contact card if outlaw in same sector • Buy fuel if solid with Harken
Operative Corvette	• Can go in any area of the board (except Reaver start locations) • Immediate Corvette Contact card if outlaw in same sector • Removes Reaver token and sends home Reavers
Reaver Cutter	• Stays in rim or border space • Reaver Contact card if in same sector as player at turn start • +1 Alert Token for each sector moved into
Alert Tokens	• Remove token when in sector then moves ship to you after a dice roll less than token count. • Corvette trumps Reaver, may move Corvette instead of Cruiser • Moves Alliance cruiser or corvette (choice) to you in Alliance Space or corvette when not in Alliance space
Disgruntled	• Can buy other players disgruntled crew • Removed with shore leave • Leave if doubly disgruntled (leader dismisses all crew) then roll die, if lower than disgruntled crew count discard a SHUTTLE card
Warrant, Wanted, Outlaw	• Warrant on ship or wanted crew create outlaw ship • Carrying contraband/fugitives are outlaw ship • Warrant loses job and solid status with active job contact and always with Harken regardless • Wanted tokens can be removed only when discarded • Wanted with Niska is bad (see card)
Medic	If crew killed and MEDIC label, save on a 5,6 roll (only
Misbehavin'	Choose option or skip if have indicated LABEL
Job, Caper, Piracy	• Jobs are: Normal, bounty or capers • Only active (e.g. equipment) during the action • Capers: only allowed with Deceptive crew. Only 1 deceptive is active at any given time • Piracy: Mr. Universe jobs cannot be used • Piracy: Subjective - immoral if moral crew, otherwise moral • Piracy: Requires boarding test then showdown
Bounty	• Are always available, Cortex allows multiples to be caught • Bounty people are killed by Reavers with fugitives/passengers • As Work Job do boarding skill test then if pass a showdown if on another ship or on same ship just disgruntle all crew • May be stolen by a player in same location by boarding test then a showdown • Bounty bonus lawmen rewards stack
Skill Tests	• Test shows icon type being tested • Roll dice, add symbols from cards • Kosherised: can only add symbols on crew • Bribes: Pay multiples of \$100 before roll for +1 • If 6, keep rolling • Boarding test: choose tech or persuasion and only 6+ is pass
